WHAT IS THIS PRODUCT?

OBJECTIVES	C Life Equities - EUR is an Internal Collective Fund 100% composed of international equities. The Fund's objective is to achieve long-term gains. Assets are only invested in UCITS ETF issued by different managers, which are in turn mainly invested in equities issued on all international markets, and on a secondary basis in liquid assets, in order to obtain a maximum return taking into account the risks assumed.
INTENDED RETAIL INVESTOR	C Life Equities targets investors who want to delegate the financial management of their savings to professionals. It is denominated in Euro. The ideal investment horizon is 8 years.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

1	2	3	4	5	6	7
Lower Risk			Higher Risk			
Your investment vehicle may entail a liquidity risk depending on the underlying assets that it is made up of. Other risks associated with the product are not taken into account in the summary risk indicator.						

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

The value of this investment vehicle is not guaranteed but is subject to upwards or downwards fluctuations depending in particular on how the financial markets perform.

This table shows the money you could get back over the recommended holding period, under different scenarios, assuming that you invest 10.000 EUR.

The different scenarios show how your investment may perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

WHAT ARE THE COSTS?

Costs over Time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the return you might get on your investment. The total costs include one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the investment vehicle itself for three different holding periods. The figures assume you invest 10 000 EUR. The figures are estimates and may change in the future.

The person selling you or advising you about this investment vehicle may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

INVESTMENT 10 000 EUR	IF YOU CASH IN AFTER 1 YEAR	IF YOU CASH IN AFTER 4 YEARS	IF YOU CASH IN AFTER 8 YEARS
